

Deaths from Disease were already declining before mass vaccination due to increased sanitation, hygiene, nutrition, and medical care:

# Vaccines: From Then to Now and into the Future

The Vaccine schedule has skyrocketed in the US in the past forty years:

**Vaccine Schedule History (0-18 years)**

By Late 1940s	By Late 1970s	2015	# of Doses in 2015
Smallpox			
Tetanus*	Diphtheria*	Diphtheria*	6
Diphtheria*	Tetanus*	Tetanus*	6
Pertussis*	Pertussis*	Pertussis*	6
	Polio (OPV)	Polio (IPV)	4
	Mumps**	Measles**	2
	Measles**	Mumps**	2
	Rubella**	Rubella**	2
		Hib	3
		Hepatitis B	3
		Hepatitis A	2
		Varicella	2
		Pneumococcal	4
		Influenza	19
		Rotavirus	3
		HPV	3
		Meningococcus	2

Taken from CDC Schedule History

217 Vaccines Currently in the Pipeline

Total = 69 Doses (49 before age 6)

A Voice for Choice advocates for people's rights to be fully informed about the composition, quality, and short- and long-term health effects of all products that go into people's bodies, such as food, water, air, pharmaceuticals and cosmetics.

Any and all donations welcome!

A Voice for Choice is a 501(c)(3) and 501(c)(4) non-profit organization

**A VOICE FOR CHOICE**

## **Vaccine Manufacturers have no liability:**

- In 1982, the leading four vaccine manufacturers threatened to stop selling vaccines in America unless a law was passed giving them complete immunity from prosecution.
- In 1986, Congress passed The National Childhood Vaccine Injury Act removing partial liability for Vaccine Manufacturers in the case of injury or death from a vaccine.
- In 1988, the National Vaccine Injury Compensation Program was established as a no-fault alternative to the tort system to address vaccine injuries and has paid out over \$3.5 billion to date for only the severest of injuries. More common, less severe injuries are not compensated for.
- In 2011, Supreme Court ruled on BRUESEWITZ ET AL. v. WYETH LLC stating that vaccines are “unavoidably unsafe”. This ruling now shields drug companies from all liability for harm caused by vaccines mandated by the government when companies could have made a safer vaccine.  
Pharmaceutical companies effectively have a monopoly on California’s medical market making it easier to add more vaccines to the schedule.
- In June 2015, California became the first state to remove the Personal Belief Exemption, thereby requiring almost every child to be vaccinated regardless of parental choice, unless the parent can homeschool or acquire a medical exemption. The law violates a child’s constitutional right to a free and public education in California.

## **Herd Immunity cannot be generated by vaccines:**

The concept of herd immunity or community immunity is based upon the idea that the more people that are immune to a disease the more likely it is that an epidemic will be prevented and the disease will become eradicated. For herd immunity to apply to vaccine-induced immunity, vaccines would need to be 100% effective, which none are. Unlike the lifetime immunity afforded by the disease, vaccine-induced immunity lasts an average of 2 to 10 years. So without continuous boosters, much of the population lacks immunity and is susceptible to the disease during an epidemic and thereby vaccines cannot provide herd immunity.

## **Common severe reactions to vaccines include:**

- Brain inflammation, Encephalopathy, Encephalitis, Meningitis
- Nerve damage
- Coma, Delirium, Seizures, Stroke
- Guillain-Barre Syndrome (GBS)
- Lupus
- Arthritis
- Diabetes
- Anaphylactic shock
- Severe inflammation of the pancreas
- Cardiomyopathy

## **Most vaccine research is conducted by the pharmaceutical companies themselves or an affiliate, resulting a lack of unbiased research.**

- No vaccine has ever been part of a gold standard, double blind placebo test.
- No research has ever been conducted on administering the combinations of vaccines recommended by the CDC.

## **Vaccines are laden with toxic ingredients whose side-effects have not been fully researched when injected:**

- Aluminum
- Thimerosal (organomercury compound)
- Formaldehyde
- Polysorbate 80
- 2-Phenoxyethanol
- CMRL-1969
- Human albumin
- MRC-5 human diploid cells derived from lung tissues of a male aborted fetus
- WI-38 human diploid cells derived from the lung tissues of a female aborted fetus
- Bovine casein/Bovine serum
- Chicken Eggs
- Insect Cells
- Mouse Brains
- MDCK (Madin-Carby canine kidney cells)
- Porcine gelatin
- Vero Cells (African Green Monkey Cells)
- Various mediums
- Other undisclosed ingredients such as peanut oil
